

Lateral_plate_mesoderm UMAP — sex

UMAP2

UMAP1

A UMAP plot showing the distribution of lateral plate mesoderm samples based on two dimensions: UMAP1 (x-axis) and UMAP2 (y-axis). The plot displays several distinct clusters of points, color-coded by sex: FEMALE (blue) and MALE (orange). A large cluster of blue points is located in the lower-left quadrant, with a smaller cluster of orange points nearby. Another large cluster of orange points is situated in the upper-left quadrant. A third, more compact cluster of blue points is positioned in the upper-right quadrant. A few isolated orange points are scattered in the lower-right quadrant. The axes are labeled "UMAP1" and "UMAP2".

- FEMALE
- MALE
